

## HOPE Quotient Outcomes Measured in Savings Group Programs

### HOPE Quotient Survey

The HOPE Quotient survey is a network listening process that is designed to:

- help us better understand HOPE programs and church partners' contribution to changes in the lives of clients/members in the 4 domains
- equip programs with actionable information to improve mission fulfillment

It occurs once every four years for all HOPE-led programs.

#### Spiritual Domain

- Engagement with the local church
- Discipleship
- Engagement with Scripture

#### Personal Domain

- Agency
- Dignity
- Hope

#### Material Domain

- Financial capacity and management

#### Social Domain

- Strong relationships with other clients and staff

### Social Domain

#### Strong relationships

Savings group members have meaningful relationships, marked by trust and support, with other savings group members.

### Material Domain

#### Financial capacity

Savings group members have access to sufficient financial resources to meet their needs.

#### Financial management skills

Savings group members save towards a goal and use healthy means to store their savings and obtain resources.

### Spiritual Domain

#### Engagement in the local church

Savings group members grow towards participation in a local church or community with believers.

#### Being discipled

Savings group members are being helped to grow and develop in their relationship with God.

#### Discipling others

Savings group members are helping others to grow and develop in their relationship with God.

#### Engaging Scripture

Savings group members who regularly attend the Word section facilitated as a group discussion feel more able to learn from Scripture on their own or in their group.

Savings group members apply Scripture to daily life.
